

G Suite for Education

One Group, One G Slide

Hello all

The children can work in a group on a single Google Slide where all changes are reflected in real time on all the group members iPads:

- Log into G Slides
- One member of the group creates a new blank G Slide or picks from a template
- This pupil then renames the file to the name of the group
- The pupil should then share the file with the other members in the group by pressing the three dots  on the file or right-clicking the file
- Pressing "Share" from the options
- Under "Share", the pupil should type in the G Mail addresses of the other members of the group e.g. jfletcher2017@stpaulssns.com
- They then press "Done" or "Share" or press the paper airplane icon
- The other members of the group should refresh their G Slide homescreen by pulling down with their finger on the iPad and the new Group Slide will be there.

Collaborate! The group can now work on a project e.g. Ancient Egypt, collaboratively providing them with the opportunity to learn new skills.

Thanks

The Digital School Team
